ARTIST STATEMENT

I am a Berlin-based artist working with sculpture and transparent reliefs. Drawn to collective fears and longings, I explore fragile structures and states of instability. Using transparent materials, I investigate how perception shifts through light, layering, and the viewer's position.

Doubt, which I understand as a condition of curiosity and search rather than certainty, is a recurring point of departure in my work. Through subtle sculptural interventions, I create quiet, tentative, at times almost animate presences. Rather than asserting fixed meanings, the works remain open, their transparency destabilizing fixed viewpoints and inviting close attention to processes of hesitation, searching, and discovery.

EXHIBITIONS
